An Introduction to Drybridge Consulting

Drybridge Consulting offers XML consulting and integration services that make it possible for companies to rapidly deploy connections between trading partners. These services allow our clients to enjoy the cost benefits of short implementation times, easy updates, and reusable code. Drybridge provides the following business integration services:

- XML message design, development, and deployment
- XML stylesheet development
- Scalable, industrial-strength integration solutions
- Secure, error-free and rapid information flow

In other words, Drybridge Consulting helps you to improve the efficiency of your business processes resulting in an improved bottom line. When you see a business process flowchart, think of Drybridge Consulting. Think of the nature of the connection. Is it:

- Internal or External
- Business-to-Business or Business-to-Consumer
- Manual or Automated
- Working Correctly... or Broken

Regardless, Drybridge Consulting has the expertise to help you!

Introducing Art Colman

Art has been involved in leading-edge XML technology for the past 15 years as Technical Director of papiNet, the global standards initiative for paper and forest products. The papiNet[®] Standard is a highly developed group of XML messages and an open set of Interoperability Guidelines that is used by over 100 paper producing and consuming companies. Art provided the XML expertise and authored the guidelines that papiNet[®] uses to ensure interoperability between the companies. In addition to his responsibilities to papiNet Art provides similar guidance to IDEAlliance as their XML Standards Implementation expert.

Art's business process expertise has been honed with over 15 years of ERP systems implementation in the paper, chemicals, consumer products, food, and pharmaceuticals industries. Art's contributions to these projects involved business process analysis, systems design, implementation support, and testing. He has managed large e-commerce integration projects, providing the technical expertise and business process knowledge to integrate suppliers and buyers across using internet technologies.
