

DRYBRIDGE CONSULTING – PRODUCT CATALOGUE

Drybridge Consulting provides a wide variety of tools for XML schema implementers, developers, and designers. These tools support the understanding, use, and communication of XML schema in order to facilitate their effective use. Visit www.drybridge.com, or [contact us](#) directly, for more information.

Accelerator					
The Drybridge Accelerator is a series of Excel Add-Ins that allow creation and communication of papiNet XML business documents from an Excel spreadsheet.					
• ProductAttributes					
• InventoryStatus					
• DeliveryMessage/GoodsReceipt					
Ensurer					
The Drybridge Ensurer supports application registration and activation.					
• Allow users to purchase application features and register software					
• Local storage of registration in an encrypted format.					
Facilitator					
The Drybridge Documentation Facilitator allows you to produce professional schema documentation using a data-dictionary and business process information.					
• Definitions can be imported-from or exported-to the XSD					
• Create a global data dictionary or message specific documentation					
Harmonizer					
The Drybridge Harmonizer allows you to simplify large XML schema by creating subsets that communicate your business requirements.					
• Create and compare multiple schema subsets					
• Produce XSD that conforms to the base standard and your subset					
Investigator					
The Drybridge Schema Investigator simplifies the implementation of schema changes through difference analysis.					
• Compare two schemas or two groups of schemas.					
• Produces a business analysis or a technical analysis					
Producer					
The Drybridge Stylesheet Producer generates stylesheets and XForm templates based upon a schema subset.					
• This tool is expected to be available 2 nd Qtr 2009					

Symbol Key
